## SKILLS

AI developer focused on building real-world **LLM applications**, **RAG systems**, and **Agentic AI** workflows using **LangChain**, **OpenAI API**, and **vector databases** (FAISS, Chroma). Experienced in developing AI-powered applications with **FastAPI** backends, **React.js** frontends, and integrating models from **OpenAI**, **Gemini**, and **HuggingFace** into production-ready full-stack systems.

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| Full Stack       | React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Auth         |
| Gen AI           | LLM Applications, RAG Systems, Agentic AI, Prompt Engineering       |
| AI Tools         | LangChain, LangGraph, OpenAI API, Gemini, Ollama, HuggingFace       |
| Languages        | Python, JavaScript, Java                                            |
| Databases        | Vector Databases (FAISS, Chroma), MongoDB, SQL                      |
| Tools & Workflow | Docker, Git, GitHub, n8n, Claude, Cursor, Copilot, Postman, FastAPI |

## EDUCATION

|                                  |                      |
|----------------------------------|----------------------|
| ABES Institute of Technology     | Ghaziabad, India     |
| B.Tech in Information Technology | Nov 2022 – June 2026 |
| Sai Millennium Sr. Sec. School   | Bijnor, India        |
| Senior Secondary Education       | 2020 – 2022          |

## PROJECTS

**AyurSutra - AI Wellness Platform** **Tech Stack:** MERN, FastAPI, NLP, Sentiment Analysis  
[🔗 Live Demo](#) | [🔗 GitHub](#)

- Built a full-stack **MERN** Ayurveda therapy booking platform with role-based access, auto-scheduling engine, and real-time notification alerts for patients and doctors.
- Integrated an **AI-powered NLP sentiment analysis** module to classify feedback across 3 categories and generate visual trend graphs.

**CuraLink – AI Medical Assistant** **Tech Stack:** Python, LangChain, FAISS, FastAPI, HuggingFace, React.js  
[🔗 Live Demo](#) | [🔗 GitHub](#)

- Designed a **multi-source retrieval system** integrating PubMed, OpenAlex, and ClinicalTrials.gov, fetching **200+ results in parallel** and using **OpenAI** embeddings with a **FAISS index** for semantic search.
- Built the backend with **FastAPI**, featuring **LLM agent**, **tool-calling**, and **conversational memory** to enable context-aware multi-turn queries.

**VibeAI – Your Personal AI Companion** **Tech Stack:** Python, LangGraph, FastAPI, React.js, SQLite  
[🔗 Live Demo](#) | [🔗 GitHub](#)

- Built a full-stack **AI companion chatbot** using **LangGraph** with **short-term memory** and **SQLite-based persistent conversation storage**, enabling users to resume chats seamlessly anytime.
- Developed a **FastAPI** backend using **OpenAI** for real-time LLM inference and a **React.js** frontend for smooth, interactive chat experience.
