SKILLS

Software developer with Gen AI focused on building real-world **LLM applications**, **RAG systems**, and **Agentic AI** workflows using **LangChain**, **OpenAI API**, and **vector databases** (FAISS, Chroma). Experienced in developing AI-powered applications with **FastAPI** backends, **React.js** frontends, and integrating models from **OpenAI**, **Gemini**, and **HuggingFace** into production-ready full-stack systems.

Gen AI	LLM Applications, RAG Systems, Agentic AI, Prompt Engineering
AI Tools	LangChain, OpenAI API, Gemini, Ollama, HuggingFace
Languages	Python, JavaScript Java
Frameworks	FastAPI, React.js, Node.js, Express.js
Databases	Vector Databases (FAISS, Chroma), MongoDB, SQL
DevOps & Tools	DockerGit, GitHub, VS Code, Postman, REST APIs
Core Subjects	Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

EDUCATION

ABES Institute of Technology B.Tech in Information Technology	Ghaziabad, India Nov 2022 – June 2026
Sai Millennium Sr. Sec. School Senior Secondary Education	Bijnor, India 2020 – 2022

PROJECTS

AyurSutra Live Demo GitHub	Tech Stack: MERN, FastAPI, NLP, Sentiment Analysis, JWT
- Built a full-stack Ayurveda therapy booking platform with role-based access, auto-scheduling engine, and real-time notification alerts for patients and doctors. - Integrated an AI-powered NLP sentiment analysis module to classify feedback across 3 sentiment categories and generate visual trend graphs. - Implemented JWT authentication and bcryptjs password hashing for secure access across both user roles. - Built as a solution to a Smart India Hackathon (SIH) 2024 problem statement under the Ministry of AYUSH.	
YouTube Chatbot GitHub	Tech Stack: Python, LangChain, Chroma, FastAPI, OpenAI, React.js
- Built an end-to-end RAG pipeline ingesting YouTube transcripts via <code>youtube_transcript_api</code>, embedding chunks using OpenAI text-embedding-3-large, and storing in a vector database for semantic retrieval. - Engineered a LangChain QA chain for context-aware natural language responses grounded in retrieved transcript chunks. - Developed a FastAPI backend for LLM inference and a React.js frontend for real-time chat interaction.
